

Statement
H.E. Ambassador Yusra Khan
Deputy Permanent Representative
Permanent Mission of the Republic of Indonesia to the United Nations
Security Council Open Debate:
Secretary-General's Report on Peacebuilding in the Aftermath of Conflict

New York December 20, 2012

Mr. President,

I thank you for convening this important open debate on post-conflict peacebuilding, and the report of the Secretary-General on Peacebuilding in the Aftermath of Conflict, S/2012/746.

I would also like to thank the Secretary-General for his remarks and his report, detailing the achievements by the UN in the area of post-conflict peacebuilding since his last progress report on the subject in 2010.

My delegation thanks H.E. Ambassador Momen, our current PBC Chair on his useful statement, as well as, Ms. Judy-Cheng Hopkins, ASG for PBSO on her comprehensive briefing.

Indonesia aligns with the statement made by Iran on behalf of the Non-Aligned Movement.

We commend the Secretary-General and his team for the progress made on what is a dynamic and difficult global agenda of helping the conflict-affected countries navigate their peace and development. Yet a more intensive and constant effort by the UN and international community is required to deepen the impact on ground, and strengthen the countries' capacities and institutions so that they can consolidate peace effectively.

Although there has been significant advancement on the implementation of the 2009 agenda for action in peacebuilding, advancement on the seven-point plan action plan for gender-responsive peacebuilding has been modest.

As mentioned in the report, post-conflict countries often continue to experience instability years after the end of armed conflict with high levels of relapse into violence. This is a deeply concerning situation.

The success by post-conflict countries depends predominantly on the quality of their nationally identified and nationally owned and driven peacebuilding. At the same time, this quality, in large measure, depends on the support from a robust and responsive global peacebuilding architecture.
